SCHMETZ INSIDE

VERITAS Elastica - Inexpensive to great results

A clean, safe and elastic overlock seam, no matter whether with 2, 3 or four threads. Hemming, cutting and sewing, in one step and with up to 1000 stitches per minute are the distinguishing features of the VERITAS Elastica. And this also applies to thick materials like jeans, leather or coat fabric. With the differential feed the seams, rolled or narrow seams become straight and roll up only when desired. The fabric residues are neatly collected in the practical collection container.

Simply improves results

The VERITAS Elastica can be used with 2, 3 or even 4 threads, which helps to create a particularly elastic, and at the same time safe, overlock seam. All four thread guides are colour coded, which makes threading much easier.

The cut-off fabric remnants are collected in the integrated collecting container without impacting your work. And behind it, there is a compartment with lots of accessories such as an upper knife and tweezers that you can reach for quickly. This makes sewing more fun.

All's well that ends well

The sewing itself is only as good as the bind off. A glance at the hem or waistband seams immediately shows how much care and skill has been put into the work. Or equally if it has been done with the VERITAS Elastica.

Professional finishes are a matter of course with this portable 4-3-2-thread overlock machine. It hems, cuts and sews in a single stroke - electronically controlled with up to 1000 stitches per minute. The powerful motor can even manage sturdy materials such as leather or coat fabric, which can also be processed in several layers without any problems thanks to the high needle level. This simply puts the finishing touches to your own creation.

Specialist with many skills

Featuring 12 stitch types such as rolled hem, narrow hem or overlock stitch with 2 and 3 threads, the VERITAS Elastica has everything you need for a perfect finishing hem. The differential feed is particularly practical and ensures you never have any unintentionally wavy or curled seams again. Even elastic fabrics such as jersey are fed evenly so that the seams are always smooth. The feeders can also be adjusted in such a way that a wavy hem can be created on purpose.

However, the VERITAS Elastica can do much more than just help with serging. Just fold away the knife with one hand and you can sew with the classic technique. Stitch length and thread tension can be adjusted precisely, and thus the VERITAS Elastica can even replace a classic sewing machine.

Specifications

12 stitches, e.g. rolled hem, narrow hem, 3- and 2- thread overlock stitch

75 - 1000 stitches per minute (electronically controlled)

Adjustable stitch length and width

Differential feed dogs

Waste collector

4-3-2 thread overlock machine

Clear colour-coded thread fence

Prethreaded

Built-in thread cutter

Adjustable presser foot pressure

Adjustable thread tension

Extra high needle position

Solid construction

Integrated detachable accessory box
