Troubleshooting FAQs

The microphone on my Razer Kraken X USB isn't sensitive enough. It will only pick up my voice when I turn up the microphone level to max sensitivity through Windows. And, when I do that, it adds static and distorts my voice. How can I fix this?

Here are a few suggestions that may help:

1. Make sure the mic diaphragm is in front and the air vent is facing away from your mouth.

2. Check that the PC is configured to use the correct recording device under Control Panel > Sound > Recording. Select the proper recording device, right-click on it, and select "Set Default Device" or "Select Default Communication Device".
3. Under Control Panel > Sound > Communications, select "Do Nothing".
4. Under Control Panel > Sound > Recording > Properties > Enhancements, select "Disable all sound effects" or try a combination of enhancements that works for your setup.
5. Under Control Panel > Sound > Recording > Properties > Advanced > Default Format, select "2 channel, 16 bit, 48000Hz (DVD Quality)", if available.

I have no audio when using the Razer Kraken X USB headset.

Obsah je uzamčen

Dokončete, prosím, proces objednávky.

Následně budete mít přístup k celému dokumentu.

Proč je dokument uzamčen? Nahněvat Vás rozhodně nechceme. Jsou k tomu dva hlavní důvody:

- 1) Vytvořit a udržovat obsáhlou databázi návodů stojí nejen spoustu úsilí a času, ale i finanční prostředky. Dělali byste to Vy zadarmo? Ne*. Zakoupením této služby obdržíte úplný návod a podpoříte provoz a rozvoj našich stránek. Třeba se Vám to bude ještě někdy hodit.

**) Možná zpočátku ano. Ale vězte, že dotovat to dlouhodobě nelze. A rozhodně na tom nezbohatneme.*

- 2) Pak jsou tady „roboti“, kteří se přiživují na naší práci a „vysávají“ výsledky našeho úsilí pro svůj prospěch. Tímto krokem se jim to snažíme překazit.

A pokud nemáte zájem, respektujeme to. Urgujte svého prodejce. A když neuspějete, rádi Vás uvidíme!
