

# DAILY REFERENCE GUIDE

**THANK YOU FOR BUYING A WHIRLPOOL PRODUCT.**  
In order to receive a more complete assistance, please register your appliance on: [www.whirlpool.eu/register](http://www.whirlpool.eu/register)

You can download the Safety Instructions and the User Manual, by visiting our website [docs.whirlpool.eu](http://docs.whirlpool.eu) and following the Instructions on the back of this booklet.

**Before using the appliance carefully read Safety Instructions guide.**

## PRODUCT DESCRIPTION

### APPLIANCE

1. Upper rack
2. Foldable flaps
3. Upper rack height adjuster
4. Upper spray arm
5. Lower rack
6. Cutlery basket
7. Lower spray arm
8. Filter Assembly
9. Salt reservoir
10. Detergent and Rinse Aid dispensers
11. Rating plate
12. Control panel

### CONTROL PANEL

1. On-Off/Reset button with indicator light
2. Program selection button with indicator light
3. Half Load button with indicator light
4. Salt refill indicator light
5. Rinse Aid refill indicator light
6. Program indicator lights
7. Delay indicator light
8. Delay button with indicator light
9. Tablet (Tab) button with indicator light
10. Start/Pause button with indicator light / Drain out

# FIRST TIME USE

## SALT, RINSE AID AND DETERGENT

### ADVICE REGARDING THE FIRST TIME USE

After installation, remove the stoppers from the racks and the retaining elastic elements from the upper rack.

### FILLING THE SALT RESERVOIR

The use of salt prevents the formation of LIMESCALE on the dishes and on the machine's functional components.

- It is mandatory that **THE SALT RESERVOIR NEVER BE EMPTY.**
- It is important to set the water hardness.

The salt reservoir is located in the lower part of the dishwasher (see *PRODUCT DESCRIPTION*) and must be filled when the **SALT REFILL indicator light**  in the control panel is lit.

1. Remove the lower rack and unscrew the reservoir cap (anticlockwise).
2. **Only the first time you do this: fill the salt reservoir with water.**
3. Position the funnel (see figure) and fill the salt reservoir right up to its edge (approximately 1 kg); it is not unusual for a little water to leak out.
4. Remove the funnel and wipe any salt residue away from the opening.

Make sure the cap is screwed on tightly, so that no detergent can get into the container during the wash program (this could damage the water softener beyond repair).

**Whenever you need to add salt, it is mandatory to complete the procedure before the beginning of the washing cycle to avoid corrosion.**

### SETTING THE WATER HARDNESS

To allow the water softener to work in a perfect way, it is essential that the water hardness setting is based on the actual water hardness in your house. This information can be obtained from your local water supplier.

The factory sets the default value for the water hardness.

- Switch on the appliance by pressing the **ON/OFF** button.
- Switch off the appliance by pressing the **ON/OFF** button.
- Hold down button **START/Pause** for 5 seconds, until you hear a beep.
- Switch on the appliance by pressing the **ON/OFF** button.
- The program indicator light of the current set level flashes.
- Press button **P** to select the desired hardness level (see *WATER HARDNESS TABLE*).

Water Hardness Table				
Level		°dH German degrees	°fH French degrees	°Clark English degrees
1	Soft	0 - 6	0 - 10	0 - 7
2	Medium	7 - 11	11 - 20	8 - 14
3	Average	12 - 16	21 - 29	15 - 20
4	Hard	17 - 34	30 - 60	21 - 42
5	Very hard	35 - 50	61 - 90	43 - 62

- Switch off the appliance by pressing the **ON/OFF** button.

Setting is complete!

As soon as this procedure is complete, run a program without loading.

**Only use salt that has been specifically designed for dishwashers.**

After the salt has been poured into the machine, the SALT REFILL indicator light switches off.

**If the salt container is not filled, the water softener and the heating element may be damaged as a result of limescale accumulation.**

**Using of Salt is recommended with any type of dishwasher detergent.**

### FILLING THE RINSE AID DISPENSER

Rinse aid makes dish DRYING easier. The rinse aid dispenser **A** should be filled when the **RINSE AID REFILL**  indicator light in the control panel is lit.

1. Open the dispenser **B** by pressing and pulling up the tab on the lid.
2. Pour in the rinse aid (max.110 ml), making sure it does not overflow from the dispenser. If this happens, clean the spill immediately with a dry cloth.
3. Press the lid down until you hear a click to close it.

**NEVER pour the rinse aid directly into the appliance tub.**

### ADJUSTING THE DOSAGE OF RINSE AID

If you are not completely satisfied with the drying results, you can adjust the quantity of rinse aid used.

- Switch the dishwasher on using the **ON/OFF** button.
- Switch it off using the **ON/OFF** button.
- Press button **START/Pause** three times - a beep will be heard.
- Switch it on using the **ON/OFF** button.
- The program indicator light of the current set level flashes.
- Press button **P** to select the level of rinse aid quantity to be supplied.
- Switch it off using the **ON/OFF** button

Setting is complete!

If the rinse aid level is set to 1 (ECO), no rinse aid will be supplied. The LOW RINSE AID indicator light will not be lit if you run out of rinse aid.

A maximum of 5 levels can be set according to the dishwasher model. The factory setting is specific to the model, please follow instruction above to check this for your machine.

- If you see bluish streaks on the dishes, set a low number (2-3).
- If there are drops of water or limescale marks on the dishes, set a mid-range number (4-5).

### FILLING THE DETERGENT DISPENSER

**To open the detergent dispenser use the opening device C. Introduce the detergent into the dry dispenser D only. Place the amount of detergent for pre-washing directly inside the tub.**

1. When measuring out the detergent refer to the mentioned earlier information to add the proper quantity. Inside the dispenser **D** there are indications to help the detergent dosing.
2. Remove detergent residues from the edges of the dispenser and close the cover until it clicks.
3. Close the lid of the detergent dispenser by pulling it up until the closing device is secured in place.

The detergent dispenser automatically opens up at the right time according to the program.

If all-in-one detergents are used, we recommend using the **TABLET** button, because it adjusts the program so that the best washing and drying results are always achieved.

**Usage of detergent not designed for dishwashers may cause malfunction or damage to the appliance.**

# PROGRAMS TABLE

Program			Drying phase	Available options <sup>*)</sup>	Duration of wash program (h:min) <sup>**)</sup>	Water consumption (litres/cycle)	Energy consumption (kWh/cycle)
1. Eco	ECO	50°	✓	  	4:00	11.5	0.84
2. Intensive		65°	✓	  	2:30	15.0	1.50
3. Mixed		55°	✓	  	2:25	15.0	1.35
4. Rapid 30'		50°	-	 	0:30	8.0	0.50
5. Pre-Wash		-	-	 	0:10	4.0	0.01

ECO program data is measured under laboratory conditions according to European Standard EN 60436:2020.

Note for Test Laboratories:

For information on comparative EN testing conditions, please send an email to the following address: [dw\\_test\\_support@whirlpool.com](mailto:dw_test_support@whirlpool.com)

Pre-treatment of the dishes is not needed before any of the programs.

\*) Not all options can be used simultaneously.

\*\*) Values given for programs other than the program Eco are indicative only. The actual time may vary depending on many factors such as temperature and pressure of the incoming water, room temperature, amount of detergent, quantity and type of load, load balancing, additional selected options and sensor calibration. The sensor calibration can increase program duration up to 20 min.

## PROGRAMS DESCRIPTION

### Instructions on wash cycle selection.

#### 1 ECO

Eco programme is suitable to clean normally soiled tableware, that for this use, it is the most efficient programme in terms of its combined energy and water consumption, and that it is used to assess compliance with the EU Ecodesign legislation.

#### 2 INTENSIVE

Program recommended for heavily soiled crockery, especially suitable for pans and saucepans (not to be used for delicate items).

#### 3 MIXED

Mixed soil. For normally soiled dishes with dried food residues.

#### 4 RAPID 30'

Program to be used for half load of lightly-soiled dishes with no dried food residues. Does not include drying phase.

#### 5 PRE-WASH

Use to refresh crockery planned to be washed later. No detergent to be used with this program.

#### Notes:

Please note that cycle *Rapid 30'* is dedicated for lightly soiled dishes.

# Obsah je uzamčen

**Dokončete, prosím, proces objednávky.**

**Následně budete mít přístup k celému dokumentu.**

**Proč je dokument uzamčen? Nahněvat Vás rozhodně nechceme. Jsou k tomu dva hlavní důvody:**

- 1) Vytvořit a udržovat obsáhlou databázi návodů stojí nejen spoustu úsilí a času, ale i finanční prostředky. Dělali byste to Vy zadarmo? Ne\*. Zakoupením této služby obdržíte úplný návod a podpoříte provoz a rozvoj našich stránek. Třeba se Vám to bude ještě někdy hodit.

*\*) Možná zpočátku ano. Ale vězte, že dotovat to dlouhodobě nelze. A rozhodně na tom nezbohatneme.*

- 2) Pak jsou tady „roboti“, kteří se přiživují na naší práci a „vysávají“ výsledky našeho úsilí pro svůj prospěch. Tímto krokem se jim to snažíme překazit.

A pokud nemáte zájem, respektujeme to. Urgujte svého prodejce. A když neuspějete, rádi Vás uvidíme!
