1 Product Introduction

This product is mainly used for shower filtration. Municipal tap water is used as water supply. It does not need door-to-door installation. Please install it according to this user manual.

2 Installation

Take out the filter cartridge and remove the covers at both ends of the cartridge. Put the cartridge back in the case.

Remove the hose from the water mixing valve, and connect and tighten the shower filter with the valve from the water inlet end.

Turn on the tap for 2-3 minutes to check if there is any leakage.

Connect the hose to the water outlet end of the filter.

3 Maintenance

- If the filter is not used for 2 days, let the water run about a minute before use again.
- If the filter is not used for more than a week, remove and drain the cartridge. Wrap and store it in the chiller of the fridge. Let the water run for 3 minutes before use again.
- If the filter has been used for a long time and water flow obviously decreases, remove the cartridge and shake it, then flush it with water from both ends.
- Replace the cartridge every 6 to 12 months based on the tap water quality and usage frequency. The model number is AWP175.

4 Precautions

- This product is for tap water only. Do not use water of unknown source.
- Do not install it if the water supply is with water pressure exceeding 0.4MPa.
- If the pressure exceeds 0.4MPa, pressure-reducing valve should be added which needs to be purchased separately.
- The inlet water temperature should be 5-60°C, otherwise the cartridge will be damaged.
- The water treated by this product is for showering only. Do not drink the water filtered by it.
- The cartridge can only be cleaned with water. No detergents should be used because they will damage the filter."

5 Warranty

This product includes a 2-year warranty from the date of purchase. For more detail about warranty conditions, please visit: www.Philips.com.

Within two years from the date of purchase, you will receive free warranty against defects in materials and workmanship, when used in compliance with the user manual and confirmed by our maintenance service.

The warranty service does not include frequent replaced consumable components (filter cartridge, granular activated carbon, ion exchange resin, hollow fiber membrane, etc.), auxiliary devices, transportation fee and door-to-door service.

Obsah je uzamčen

Dokončete, prosím, proces objednávky.

Následně budete mít přístup k celému dokumentu.

Proč je dokument uzamčen? Nahněvat Vás rozhodně nechceme. Jsou k tomu dva hlavní důvody:

- 1) Vytvořit a udržovat obsáhlou databázi návodů stojí nejen spoustu úsilí a času, ale i finanční prostředky. Dělali byste to Vy zadarmo? Ne*. Zakoupením této služby obdržíte úplný návod a podpoříte provoz a rozvoj našich stránek. Třeba se Vám to bude ještě někdy hodit.

**) Možná zpočátku ano. Ale vězte, že dotovat to dlouhodobě nelze. A rozhodně na tom nezbohatneme.*

- 2) Pak jsou tady „roboti“, kteří se přiživují na naší práci a „vysávají“ výsledky našeho úsilí pro svůj prospěch. Tímto krokem se jim to snažíme překazit.

A pokud nemáte zájem, respektujeme to. Urgujte svého prodejce. A když neuspějete, rádi Vás uvidíme!
