NOTES CONCERNING OPERATION

POWER SOURCE

- ◆ Do not use a damaged plug.
- ◆ Do not pull the plug. Do not touch the plug when your hands are wet.
- ◆ The plug should not be over-bent or pressed under a heavy thing.
- ◆ Please remove the plug from the outlet when there are thunders and lightning or the refrigerator is not to be used for a long time.
- ◆ The refrigerator should not share the outlet with other appliances, otherwise electric shock and fire may happen.
- ◆ Check the voltage of refrigerator if it is in conformity with that of outlet before plugging.
- ◆ The permissible voltage range is 98-143V. If the voltage of your power source is not in this range, you have to use a 500W automatic regulator, which can easily be found on the market.
- ◆ The extension of power line is not recommended. If you want to use a connection plate, it should be in line with the capacity of refrigerator and nicely grounded. The connection plate should be hung up or put at a place more than 200mm far from the refrigerator.

If the supply cord is damaged, it must be replaced by manufacturer, retailer, its service agent or similar qualified person in order to avoid a hazard.

ATTENTION

- ◆ Please do not put your hands under the refrigerator.
- ◆ Do not put cigarette butts or candles on the refrigerator. The refrigerator should be far away from any heat source.
- ◆ Please do not put heavy things on the refrigerator.

CLEANING

- ◆ Do not clean the refrigerator with water or chemicals.
- ◆ If there is dirt on the plug, please use it after cleaning.
- ◆ Please wait 5 minutes when you want to insert the plug into the outlet again after it was removed.

SET UP

Please read the following section carefully to avoid any injury of personnel and damage of property.

Place the refrigerator on a rigid and horizontal surface and flat it with the adjusting foot.

The refrigerator should be put in a place with good ventilation. There should be a distance of over 5cm to both sides and the rear and over 10cm to the top.

- ◆ Do not place the refrigerator in a place with direct sunshine or near the heat source (such as gas stove and oven) or in a damp place.
- ◆ The refrigerator should be put in a place near the outlet.

Please use a separate 220~240V outlet for the refrigerator.

- ◆ The refrigerator should be nicely grounded. Do not ground it through phone line or gas pipe.
- ◆ The replacement of power line needs special tools, so please contact the service center if your power line is damaged.

Noises will arise when something is beside, behind or on the refrigerator.

The ambient temperature should be over 5°C, otherwise the refrigerator may freeze up.

ATTENTION

- ◆ The refrigerator must be correctly grounded, otherwise incident may happen.
- ◆ Do not put the refrigerator upside down or transversely. The slope between the refrigerator and the floor should never be more than 45°.

6. RESET MODE

- ◆6-1 If you press the white wine key and the red wine key simultaneously, all indicators will go out.
- ◆6-2 After 3 seconds, all settings will become ex-factory ones.

7. KEYBOARD LOCK MODE

- ◆7-1 Please press the white wine key and the internal lamp key together for 3 seconds.
- ◆7-2 The refrigerator will run in the keyboard lock mode if it was not running in that mode before the keys are pressed. Otherwise, the refrigerator will exit from the keyboard lock mode.
- ◆7-3. In the keyboard lock mode, no action will happen and DISPLAY will show "LO" if any key is pressed (internal lamp key excluded). When the key is released, DISPLAY will show the actual temperature.

MAINTENANCE & CLEANING

Please remove the plug from the outlet first before cleaning.

Inside

- ◆Please take out the racks, wash them with sterilization spray and dry them with a clean cloth. The door should be cleaned carefully by using neutral detergent and a soft cloth.

Water collector

- ◆Pour out the water in the collector and replace it after cleaning.

Attention

- ◆The plug should be removed from the outlet and the door should be opened when you are doing the cleaning or the refrigerator is not to be used for a long time.
- ◆Do not clean the refrigerator with water or chemicals.

CAUTION

- ◆Do not disassemble, repair and rebuild the refrigerator by yourself.
- ◆Do not let children play around the refrigerator. If the refrigerator is to be discarded, please remove the door in order to prevent the child from being sealed in it.
- ◆Do not put inflammable near the refrigerator.
- ◆When gas leaking happens, do not remove the plug from the outlet or adjust the temperature. Please turn off the gas first.
- ◆Please remove the plug from the outlet immediately when there are noises, fumes or abnormal odor in the refrigerator and contact the service center promptly.
- ◆Do not put thermal bottle, medicine or metal chains on the refrigerator.

WARNING

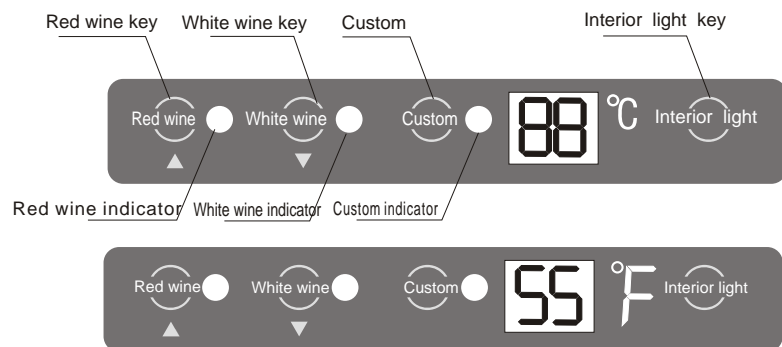

- ◆Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.
- ◆Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
- ◆Do not damage the refrigerant circuit.
- ◆Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.

ADDITION

Instructions for replacing the illuminating lamps

- ◆When the lamp need to be replaced, please power off the wine chiller at first, then remove the two screws that were used to fix the lamp cover, removing the lamp cover and then pull the old lamp, replacing a new one, fixing the lamp cover with screws.
- ◆Finally, power on the wine chiller.
- ◆Max. rated input of lamp: 7W

CONTROL PANEL

After the power is switched on, all indicators will light up for self-inspection and then the refrigerator will be automatically set on the red wine mode. At that time, the red wine indicator will light up and DISPLAY will show the actual temperature.

Note:

In the red wine mode, the temperature setting is 13°C (55°F) [15°C~12°C (59°F~54°F)], which is suitable mainly for the storage of red wine.

In the white wine mode, the temperature setting is 7°C (45°F) [9°C~5°C (48°F~41°F)], which is suitable mainly for the storage of white wine.

In the custom mode, the temperature can be set in the range of 4°C~18°C (40°F~65°F) according to user's requirement.

1. RED WINE MODE

- ◆1-1 If you press the red wine key when the refrigerator is in the red wine mode, DISPLAY will show the temperature setting 13°C (55°F).
- ◆1-2 If you press the red wine key when the refrigerator is not in the red wine mode, the red wine indicator will light up, DISPLAY will show the temperature setting of red wine 13°C (55°F) and the refrigerator will start running in the red wine mode.
- ◆1-3 When the red wine key is released, DISPLAY will show the actual temperature.

2. WHITE WINE MODE

- ◆2-1 If you press the white wine key when the refrigerator is in the white wine mode, DISPLAY will show the temperature setting 7°C (45°F).
- ◆2-2 If you press the white wine key when the refrigerator is not in the white wine mode, the white wine indicator will light up, DISPLAY will show the temperature setting of white wine 7°C (45°F) and the refrigerator will start running in the white wine mode.
- ◆2-3 When the white wine key is released, DISPLAY will show the actual temperature.

3. CUSTOM MODE

- ◆3-1 If you press the custom key when the refrigerator is in the custom mode, DISPLAY will show the temperature setting.
- ◆3-2 If you press the custom key when the refrigerator is not in the custom mode, the custom indicator will light up, DISPLAY will show the temperature preset by the user and the refrigerator will start running in the custom mode.
- ◆3-3 When the custom key is released, DISPLAY will show the actual temperature.

4. ADJUSTMENT OF TEMPERATURE

- ◆4-1 Please let the refrigerator run in the user setting mode.
- ◆4-2 Press the user setting key for 3 seconds and the refrigerator will enter into the state for adjustment of temperature at that time, led will flash and show the current temperature setting.
- ◆4-3 If you press the red wine key, the temperature setting will be increased by 1°C (34°F) until it becomes 18°C (65°F). After that, the temperature setting will no longer change if you press the red wine key again. alternately, if you press the white wine key, the temperature setting will be decreased by 1°C (34°F) until it becomes 4°C (40°F). After that, the temperature setting will no longer change if you press the white wine key again.
- ◆4-4 DISPLAY will show the actual temperature after 5 seconds with the completion of adjustment.

5. INTERNAL LAMP

- ◆5-1 If you press the internal lamp key, the internal lamp will go out when it is lit, and vice versa.
- ◆5-2 When the internal lamp is continuously lit for 1 hour, it will go out automatically.
